The Price of Perfection
Individualism and Society in the Era of Biomedical Enhancement
Maxwell J. Mehlman
Mehlman tells the story of how drugs and other biomedical interventions to enhance human performance came about and examines the issues they present. He explores the policy options for maximizing the societal benefits and minimizing the harms from these technologies and offers a set of realistic recommendations to guide public policy making.

Ethics and Newborn Genetic Screening
New Technologies, New Challenges
edited by Mary Ann Baily and Thomas H. Murray
America’s newborn genetic screening program is now under pressure to make use of advanced technologies and new medical knowledge to screen for adult onset conditions, trait carrier identification, and genetic predispositions to disease. These essays study the impact of these changes on the program and offer guidance to professionals, policy makers, and the general public as they make decisions about newborn screening.

Natural Disasters and Public Health
edited by Virginia Brennan
These essays present the lessons learned from Hurricanes Katrina and Rita in 2005, providing policy makers, public policy scholars, and those working in the fields of public health and emergency planning with the tools needed to plan for large-scale emergencies and natural disasters in America’s cities and regions.

Bodies in Doubt
An American History of Intersex
Elizabeth Reis
Researching the medical and popular literature referring to cases on intersexuality or hermaphroditism, Reis explores American concepts of sexuality and gender identity from the colonial period to the late twentieth century.

Diversity and Women’s Health
edited by Sue V. Rosser
“This is the book that clearly demonstrates why we must focus on diversity and feminist perspectives in women’s health care . . . a welcome addition for women’s studies courses . . . Diversity and Women’s Health is indispensable to those interested in women’s health care.”
—Heather McIlvaine-Newsad, Western Illinois University
The Collectors of Lost Souls
Turning Kuru Scientists into Whitemen
Warwick Anderson
This riveting account of medical detective work traces the story of kuru, a fatal brain disease, and the pioneering scientists who spent decades searching for its cause. This astonishing story links sorcery with science; cannibalism with compassion; and slow viruses with infectious proteins, reshaping our understanding of what it means to do science.
